HydroBikes[®]

*Discover how much more fun
you can have on the water!*

“You don’t have to be an Olympic athlete to reap the benefits of water cycling. Recreational water cyclists burn as many calories as skaters, kayakers, high impact aerobic participants ... even joggers.”
~ John Howard, Three time Olympian

“I love my HydroBike and consider it in the category of one of the greatest purchases I have ever made in my life.” ~ Robert Thayer, Illinois

“I would personally recommend HydroBikes to any resort or rental operator looking to purchase reliable equipment that will return their investment.” ~ Robert C. Smith, Rental Operator Walt Disney World

“I personally believe that the HydroBike Explorer is the most revolutionary concept in cycling since the mountain bike, & would highly recommend it as a very safe & fun watercraft; a wonderful alternative to cycling on busy streets.”
~ Randy Schellenberg, Cycle Time Products

“We find the HydroBike a refreshing new technology which promotes our vision for the safe, non polluting, non intrusive sharing of our lakes.”
~ Conservation Trust, Meredith, New Hampshire

INTRODUCING

HydroBikes®

Keeping fit has never been so easy or so much fun!

The HydroBike gives you a real biking on water experience with the ocean, lake, or river, at your feet. HydroBikes go faster, ride easier, maneuver better, and give you freedom to travel your favorite waterway like never before. You can explore more places, experience a new kind of fun and fitness on the water, and provide many years of enjoyment for your family. Hydrobikes put a whole new spin on water recreation.

Get ready for unique family fun on the water. For everyone from 8-80! HydroBikes are easy to ride and safe for everyone. They are designed and built to perform virtually maintenance free, year after year. It’s an investment that will provide free spirited fun for all your family and friends for many years to come. Everyone who enjoys the water and cycling should have an opportunity to experience HydroBikes.

You never need to get wet!

ENGINEERED FOR FUN AND VALUE

The exceptional quality of HydroBikes is evident in every feature. This is a premier human powered watercraft. HydroBikes are geared for high performance and designed for low maintenance. You will be amazed at how much fun you'll have and how little effort it takes to pedal your favorite waterway.

BUILT FOR SAFETY AND EASY TO RIDE

From its stability to its high visibility on the water, the HydroBike is engineered for a safe, reliable ride for all ages with no skill or ability required.

PROPELLER DRIVEN FOR FAST AND EFFICIENT PERFORMANCE

The HydroBike is no slow pedal boat. The HydroBike's computer designed propulsion system features a 90% efficient propeller which allows you to cruise 5-6 miles per hour with minimum effort.

LONG LIFE PROPULSION SYSTEM

The HydroBike drivetrain has been torture tested to perform in saltwater conditions and is legendary for long life. It features all steel internals, precision gears, and premier drive chain for peak performance and life expectancy.

STRONG, LIGHT, FAST, AND VIRTUALLY UNSINKABLE

The HydroBike pontoons are unique. Smooth and sleek, they were designed by a professional canoe designer for optimum speed, maneuverability, and buoyancy. Rotationally molded and seamless, these heavy duty pontoons are built leak proof and for long life. They will float 400 lbs in rider and cargo weight.

Built
commercially
tough and
built to last

HYDROBIKE ANGLER

INCREDIBLY STURDY AND STEADY

The HydroBike is extremely stable. Sturdy platforms makes the HydroBike ideal for standing, diving, fishing, photography, or sunbathing. Your dog will enjoy coming along for the ride too. The HydroBike handles rough water well, and can perform in ocean swells up to 4 feet.

PEACE AND QUIET

The HydroBike is engineered for virtual silence to get you up close to nature without disturbing it. Those who like to fish will enjoy the ability to approach your favorite fishing hole with nary a ripple. You'll enjoy the peace and serenity of your HydroBike ride, along with the ability to have quiet conversation.

E-Z CARRYING STRAPS

Loading, unloading, lifting, and moving the HydroBike around is easy with the durable carrying straps attached at each end.

SHALLOW WATER IS NO PROBLEM

Ideal for narrow channels and shallow water, the HydroBike can navigate in as little as 12" of water. If the propeller encounters rocks, debris, or bottom, it automatically rises up over the obstacle. You can pedal right up onto the beach.

BUILT IN STORAGE

A handy storage compartment with a flip up lid allows you to bring along food or clothing for longer trips or hopping from island to island. Those who like to fish may find it handy for storing tackle and gear. Fill it with ice and transport cool drinks, or put your daily catch on ice.

TOTALLY PORTABLE

HydroBikes disassembled fit in the back of pickup trucks, vans, SUVs, and on roof racks installed on cars. Our HydroPal trailer is the perfect fit for transportation. Handy carrying straps on both ends of the Hydrobike make it easy to lift, move around, or carry. The HydroBike can be assembled or disassembled by one person in 3-4 minutes without tools. *It's easy. The inventor thought of everything!*

HydroBikes
are now
enjoyed in 70
countries

A study by Frank Katch, Professor of Exercise Science at the University of Massachusetts, and Victor Katchwater, Professor of Movement Science at the University of Michigan, found that moderate water cycling (about 60% maximum) burned an average of 546 calories per hour. The caloric burn is 8% greater than outdoor bicycling at a speed of 10 to 12 miles per hour.

Features and Specifications

FEATURES

	HydroBike	HydroBike (2-person)
Width (Hull to hull)	42 in.	84 in.
Width (Outside)	55 in.	97 in.
Weight	125 lbs.	211 lbs.
Capacity (Rider & cargo)	400 lbs.	600 lbs.
Length	10 ft.	10 ft.
Height	53 in.	53 in.
Gear Ratio	8.6:1	8.6:1
Propeller Diameter	12 in.	12 in.
Propeller Draft (200 lb. rider)	9 in.	9 in.
Hull	Seamless Molded Polyethylene	Seamless Molded Polyethylene
Frame	17 in. Powder-Coated Aluminum	17 in. Powder-Coated Aluminum
Steering	Front Rudder	2 Front Rudders
